
Carey Adkins Design

CADesign: Leader in Printed Circuit Board Design Services

Our team at CADesign is ready to meet all of your design needs.

Carey Adkins, owner and Senior Design Manager, has over 30 years experience in PCB design and engineering.

We are a recommended design bureau with Intercept Technology with 20 years experience using Intercept's Pantheon layout tool, Mozaix schematic capture, and INDX Library Management.

10 years experience using Mentor Graphics Expedition and DxDesigner schematic capture.

Altium Designer 14/15.

We have a team of knowledgeable, experienced, and hard working designers that work closely with our customers to get the job done efficiently and expeditiously.

CADesign provides leading edge circuit card design capabilities. Extensive experience with high speed designs and the need for advanced signal integrity analysis ensure complex designs function reliably in a variety of physical environments.

Our PCB designs have been used in fields ranging from GSE, Avionics, Satellites and Power Systems to Telco Equipment and Computer Networking. Our designs meet IPC class 2, class 3, and class 3A standards.
